

SIZE CHART- UNIMAGE -SHOES

The shoe chart is universal. Since we have multiple suppliers and each model may have different measurements, it is not possible for us to provide the exact measurement for each shoe. Therefore, you are advised to choose the size according to the one your child is currently wearing. If you expect his feet to grow larger by the time you wear the shoes, then it would be best to take a size larger. **Please note that our shoes for the most part are available from child to adult, therefore choose the corresponding European size.** Half-shoes are not available (take the size above if necessary).

* Insole Measurement (Estimated): Take a shoe home and measure its insole.

UNIVERSAL CHART - SHOES
